

Jets

Figure 1 displays the LHA $\lambda_{0.5}^1$ (CMS jet substructure) results. The top panel shows the differential event rate $\frac{dN}{d\ln\lambda_{0.5}^1}$ versus $\lambda_{0.5}^1$ for CMS (black squares) and Pythia 8.308 default (blue triangles) models. The bottom panel shows the ratio of the Pythia 8.308 default model to the CMS model, with a green shaded band indicating the uncertainty.
